Facilities Hub

Employee facility access, requests and issues on Microsoft Power Platform

Dataverse, model-driven app, canvas app, cloud flows

One hub, two audiences

Employees

Facility Hub (phone app)

- See personal usage and cost
- Browse facilities and details
- Request access to a facility
- Report issues and complaints

Administrators

Admin Console

- Maintain employees, facilities, usage
- Review and track every request
- Triage and resolve issues

Solution architecture

Facility Hub

Canvas app (phone)

CFH Admin Console

Model-driven app

Microsoft Dataverse

Employee, Facility, Facility Usage, Facility Request, Facility Issue

Cloud flows

Approval, weekly digest, monthly summary

Business rules

6 rules

Business process flow

Request Lifecycle, 4 stages

Dataverse data model

Employee

Organization owned

Name, code, e-mail

Department, role, location

Manager (self link)

Facility

Organization owned

Name, code, category

Monthly budget and cost

Annual budget (calculated)

Facility Usage

Organization owned

Month, frequency

Cost per use

Usage cost (calculated)

Facility

Facility Request

User owned

Request type, start date

Reason, status reason

Approver, rejection reason

Facility Issue

User owned

Category, priority

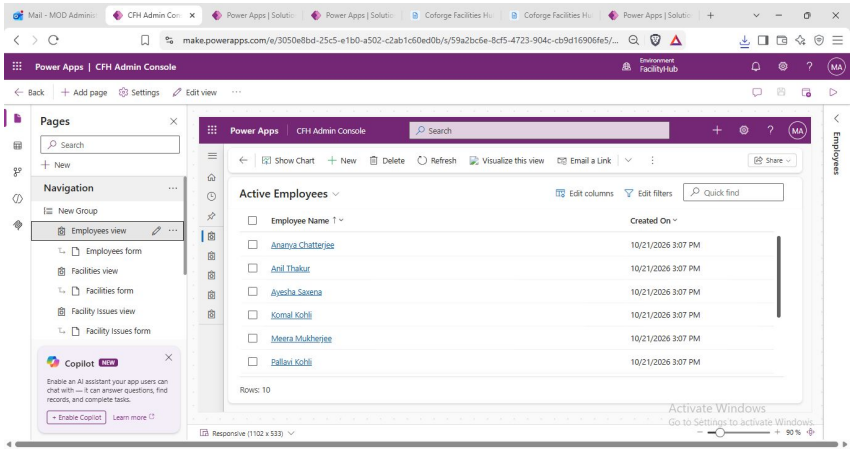

Description, status

Assigned to, resolved on

Relationships: Usage, Request and Issue each link to Employee and Facility; Request has an Approver and Issue has Reported By and Assigned To (all Employee); Facility has an owner.

10 choice columns | Data loaded from CSV files | Environment variable for the admin e-mail

Model-driven app: CFH Admin Console

Pages for every table

A view page and a form page for all five tables, built in the modern app designer.

Purpose-built views

Pending Approval, Critical Open Issues and Unassigned Issues beside the active views.

Business rules and process flow

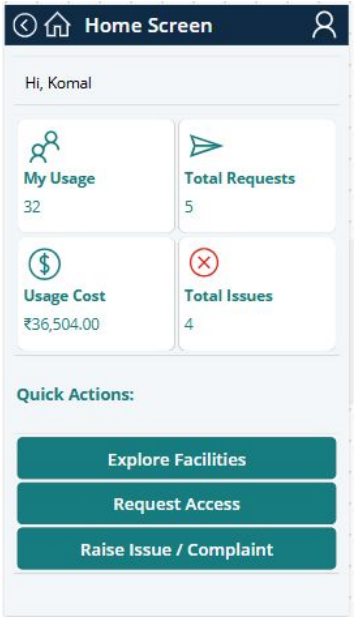

Table	Rule	Behaviour
Facility	Cost and Budget Recommended	Active facility: budget and operating cost required
Facility	Facility Cost Cannot Be Negative	Error message if operating cost is below 0
Facility	Lock Cost When Inactive	Inactive facility: budget and cost locked
Facility Issue	Escalation Notes Required	Critical priority: notes shown and required
Facility Issue	Resolved Date Required	Resolved status: Resolved On required
Facility Request	Rejection Reason	Rejected: reason shown and required

Request Lifecycle (business process flow on Facility Request)

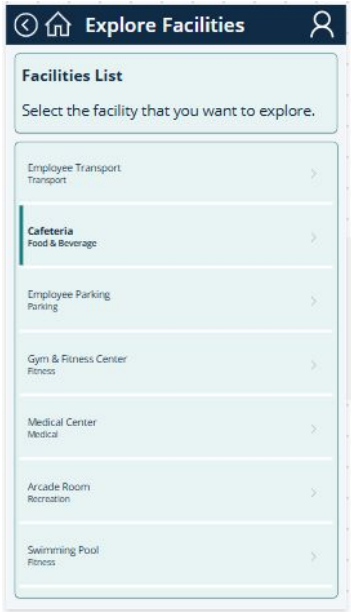

Canvas app: Facility Hub

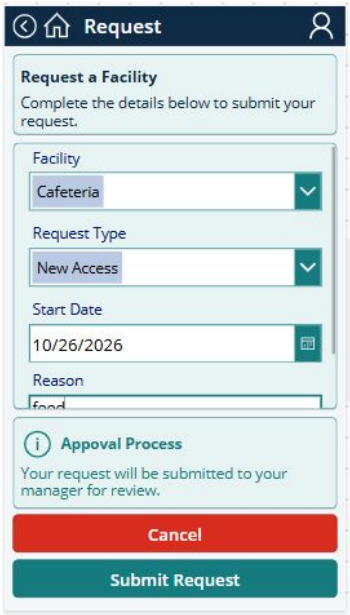

- Matches the signed-in user to an Employee by e-mail
- Personal stats: usage, requests, cost, issues
- Browse facilities, open details, request access
- Request and issue forms write straight to Dataverse
- Shared header component on all six screens

Home

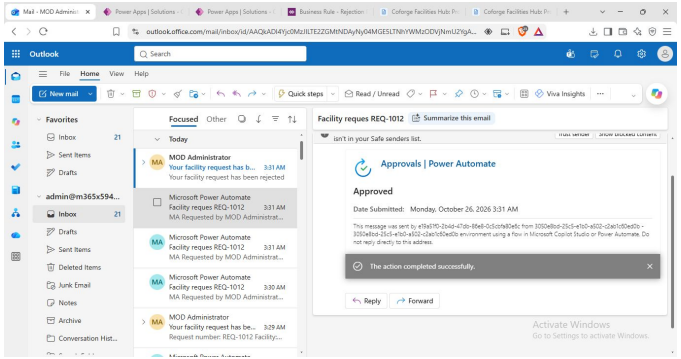

Facilities list

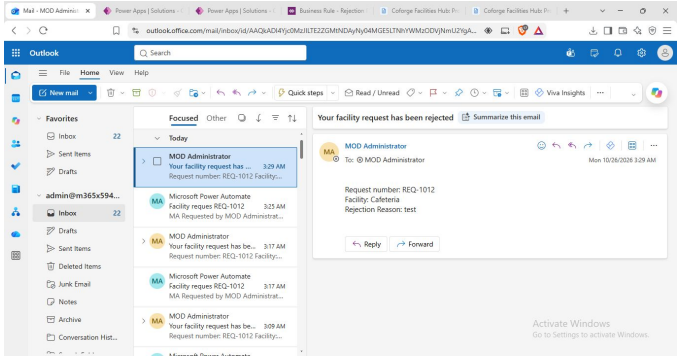

Request access

Automation: request approval

1. Row added on Facility Request
2. Look up the employee and their manager
3. Start date already passed? Set Rejected
4. Manager decides through Approvals
5. Update status and e-mail the outcome

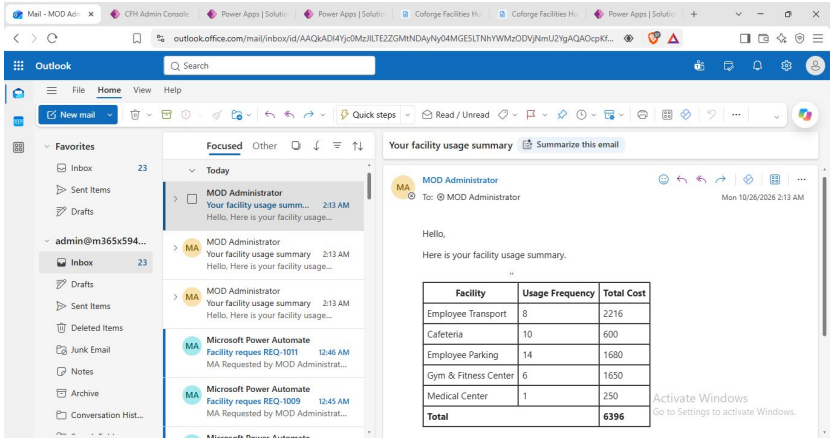

Automation: scheduled e-mails

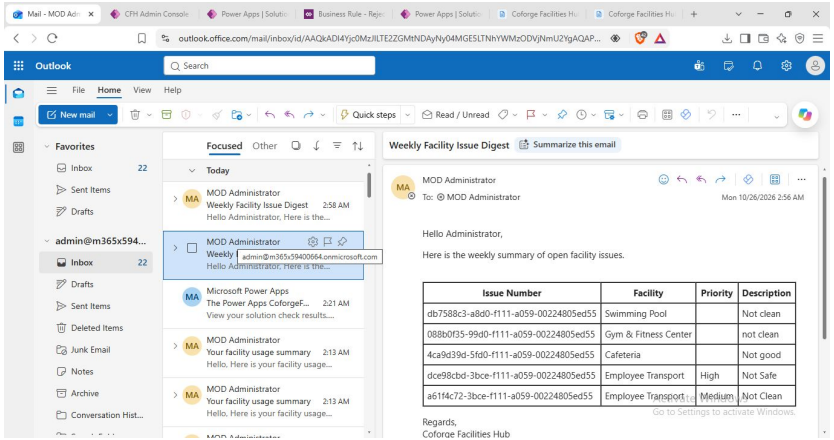

Monthly usage summary

Runs on the 1st of each month. Each employee gets last month's usage by facility with total cost.

Weekly issue digest

Runs every Saturday. The administrator gets a table of open issues, newest first.
